Assignment 5 Instructions

1. Update your assignment #4. Due to the fact that business has been good you have decided to give your customers something for free if they sign up for your newsletter.
2. Add a new page to your site that describes the free item. It should be something related thematically to the company you created in Assignment 4. An example would be a free pencil for an office supply store. 主题
3. Add another new page to your site making sure that you link to it from the free description page. On this page create a form that asks for the user's information:
 1. name - can't be empty
 2. address - can't be empty
 3. city - can't be empty
 4. state - must be one of the following: NE, IA, MN, WI, MI, IL, IN, OH, PA, MD, NJ
 5. zip code - use regex
 6. phone number - use regex
 7. email address - use regex
 8. choice of shipping options (express 1 day, standard 3 day, terrible 1 year).
4. The shipping options should be radio buttons and provide an estimated date of arrival on the page, use a Date type object based on the current day and the shipping type.
5. Validate all of the entries, including the option types, showing an error message on the page if the field doesn't pass.
6. Once all of the fields have been validated to be correct, display an alert box thanking them for their interest and clear the form.
7. Make sure the 2 pages created have the same look and feel as the pages created to Assignment 4. Poor looking design could be reflected in your grade
